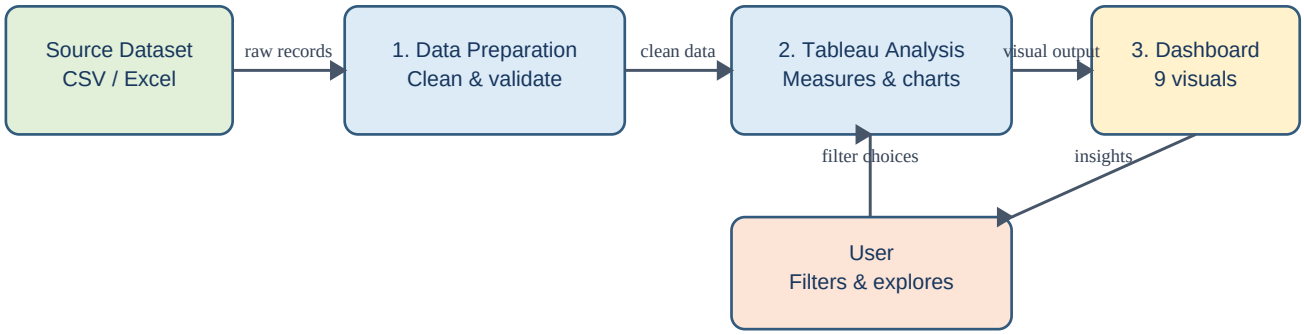
Project Design Phase-II

Data Flow Diagram & User Stories

Date	02 November 2026	**Team ID**	Not provided
Project Name	Global Fuel Prices Dashboard	**Prepared by**	Anushka Dubey

Data Flow Diagram (DFD)

The diagram below represents how source fuel-price data moves through the project workflow, from input and preparation to Tableau analysis and dashboard output.



DFD Flow Description

1. The source dataset provides country, date/year, fuel category and price records. 2. Data preparation checks field types, missing values, duplicates and consistency. 3. Tableau uses the prepared data to calculate measures and build charts. 4. The dashboard displays the results and lets users explore them through filters and tooltips.

User Stories

User Type	Functional Requirement	User Story No.	User Story / Task	Acceptance Criteria	Priority
Dashboard User	Explore dashboard	US-01	As a user, I want to open the Global Fuel Prices Dashboard so that I can view an overview of the available fuel-price data.	Dashboard opens and displays the intended charts and KPI/summary information without errors.	High
Dashboard User	Filter data	US-02	As a user, I want to filter by country or region so that I can focus on selected locations.	Selecting a country/region updates the relevant visualisations consistently.	High
Dashboard User	Compare prices	US-03	As a user, I want to compare fuel prices across countries so that I can identify higher and lower price levels.	Comparison chart displays the selected countries using the same measure and units.	High
Dashboard User	Analyse trends	US-04	As a user, I want to view prices across years or dates so that I can understand changes over time.	Time-series chart responds to the selected time period and uses correctly ordered dates/years.	High

User Type	Functional Requirement	User Story No.	User Story / Task	Acceptance Criteria	Priority
Dashboard User	Explore fuel types	US-05	As a user, I want to select a fuel type so that I can compare the available categories.	Fuel-type filter updates the relevant charts and labels clearly show the selected category.	Medium
Dashboard User	Read chart details	US-06	As a user, I want to hover over marks to see exact values and context.	Tooltips show meaningful country, period, fuel type and price details where available.	Medium
Project Owner	Refresh / validate data	US-07	As the project owner, I want to replace or refresh the source dataset so that the dashboard can use updated records.	After refresh, the workbook updates and key values are checked against the source data.	Medium
