Customer Journey Map

Date	02 November 2026	**Team ID**	Not provided
Project Name	Global Fuel Prices Dashboard	**Prepared by**	Anushka Dubey

Map the user's experience stage-by-stage, including actions, touchpoints, thoughts, feelings, ownership and improvement opportunities.

Journey Aspect	Stage 1: Discover	Stage 2: Explore	Stage 3: Interpret & Use
Actions	Opens the dashboard and reads the project title and overview.	Selects country/region, year or fuel type; compares charts and uses tooltips.	Reviews trends and comparisons; notes relevant findings or uses them in a report.
Touchpoints	Dashboard landing view, KPI cards, chart titles and instructions.	Filters, legends, interactive charts, tooltips and comparison views.	Summary insights, chart values, dashboard export or presentation.
Customer Thought	“What does this dashboard show, and what data is included?”	“How do prices differ by country, year and fuel type?”	“What are the main patterns, and what can I conclude from them?”
Customer Feeling	Curious; may need context about the dataset and measures.	Engaged; may feel uncertain if filters or chart labels are unclear.	Informed when findings are clearly labelled and supported by the data.
Process Ownership	Project owner ensures the landing view explains scope and data source.	Dashboard designer ensures filters work and charts update consistently.	Project owner validates values and communicates limitations.
Opportunities	Add a concise purpose statement, dataset coverage and units.	Use consistent colours, visible filter controls and informative tooltips.	Add a short findings summary, source note and data-period caveat.
