Communication

Date	02 November 2026	**Team ID**	Not provided
Project Name	Global Fuel Prices Dashboard	**Prepared by**	Anushka Dubey

Communication Plan

Effective communication supports a clear project workflow and a successful dashboard demonstration. The following plan is a suggested record for a single-student project; update the participants and actual meeting frequency to match what occurred.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Work planning / self-review	As needed	Project notes / checklist	Anushka Dubey	Plan tasks, track progress and confirm the next development activity.
2	Progress update	Weekly or at milestones	Faculty / mentor update	Anushka Dubey and guide (if applicable)	Share completed work, dashboard progress and pending tasks.
3	Issue / data discussion	As needed	In-person discussion / email	Anushka Dubey and guide (if applicable)	Resolve data-quality, Tableau or interpretation issues.
4	Dashboard review	Before submission	Tableau workbook / screen share	Anushka Dubey and reviewer	Check visual clarity, filters, calculations and dashboard layout.
5	Final demo rehearsal	Once before demo	Laptop / presentation	Anushka Dubey	Practise the project explanation and confirm the demonstration sequence.

Communication Challenges & Resolutions

S.No	Challenge Faced	Resolution / Action Taken
1	Inconsistent or missing values in the source dataset.	Review field types and missing values; clean or exclude invalid records where appropriate and document any limitations.
2	Charts may show misleading results if the wrong aggregation is selected.	Check whether each measure should use average, sum, minimum or maximum; use a consistent calculation and verify sample values.
3	Dashboard layout or filters may be difficult to follow during the demo.	Arrange charts in a logical order, use clear titles and legends, test each filter and rehearse the walkthrough.
