Ideation Phase

Brainstorm & Idea Prioritization

Date	02 November 2026	**Team ID**	Not provided
Project Name	Global Fuel Prices Dashboard	**Prepared by**	Anushka Dubey

Step 1: Brainstorm and Idea Listing

Ideas below focus on making global fuel-price data easier to compare, explore and explain. They are project features, not claims about findings in the dataset.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Anushka Dubey	Country-wise fuel-price comparison chart	Comparison	1
2	Anushka Dubey	Year-wise fuel-price trend visualisation	Trend analysis	2
3	Anushka Dubey	Fuel-type filter and category comparison	Interactivity	3
4	Anushka Dubey	KPI summaries for average, minimum and maximum price	Summary metrics	4
5	Anushka Dubey	Interactive dashboard with tooltips and coordinated filters	Usability	5

Step 2: Idea Prioritization

Ideas are rated by feasibility and importance for the scope of this project. The selected items form the core dashboard experience.

Group No.	Final Idea	Feasibility	Importance	Priority	Selected
1	Country and regional comparison	High	High	High	Yes
2	Time-based price trend analysis	High	High	High	Yes
3	Fuel-type comparison and filtering	High	High	High	Yes
4	KPI summary indicators	High	Medium	High	Yes
5	Interactive tooltips and coordinated filters	High	High	High	Yes
6	Automated live price feed	Low (outside current scope)	Medium	Low	No

Final Concept

Develop a Tableau-based Global Fuel Prices Dashboard containing nine visualisations and interactive filters. The dashboard should support country/region comparison, time-trend exploration and fuel-type analysis, with clear labels and validated calculations. The current scope is an analytical dashboard based on the available dataset; a live automated data feed is not assumed.
