DEMONSTRATION OF PROPOSED FEATURES

Global Fuel Prices and Taxation Trends (2020–2026)

Date	02 November 2026
Team ID	To be provided
Project Name	Global Fuel Prices and Taxation Trends (2020–2026)
Presenter	Anushka Dubey
Maximum Marks	1 Mark

Demonstration of Proposed Features

This document records the key features proposed for the project and provides a checklist for confirming their implementation and demonstration. Feature status should be checked against the final Tableau workbook before submission.

S.No.	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Fuel Price Trends	Displays the movement of fuel prices across the selected time period.	Implemented*	To confirm	Capture full trend view.
2	Quarterly Fuel Price Trends	Shows quarter-wise changes in fuel prices.	Implemented*	To confirm	Show quarter-level variation.
3	Regional Comparison	Compares fuel-price patterns across the seven regions.	Implemented*	To confirm	Use a selected fuel type/year.
4	Regional Tax Comparison	Compares tax-related values across regions.	Implemented*	To confirm	Explain the measure and unit.
5	Country Ranking	Ranks countries based on the selected fuel-price measure.	Implemented*	To confirm	Point out ranking changes by filter.
6	Subsidy vs Fuel Price	Explores the relationship between subsidy values and fuel prices.	Implemented*	To confirm	Describe association, not causation.
7	Tax Analysis	Presents tax-related measures for comparison and interpretation.	Implemented*	To confirm	Check labels and aggregation.
8	Tax Share by Income Group	Compares tax share across income groups, where the required field is available.	Implemented*	To confirm	Confirm income-group field exists.

S.No.	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
9	Taxation vs Subsidies	Compares taxation and subsidy measures in one analytical view.	Implemented*	To confirm	Clarify definitions and scale.
10	Interactive Filters	Allows users to filter views by year, region and fuel type.	Implemented*	To confirm	Test filter actions across sheets.
11	KPI Cards	Summarises key indicators at the top of the dashboard.	Implemented*	To confirm	Verify each KPI against source data.

*The project description indicates these dashboard elements were created. Please verify each item in the final workbook; change any status that is not yet implemented.

Feature Implementation Summary

Total Features Proposed	11
Total Features Implemented	11* (verify against final workbook)
Total Features Demonstrated	To be filled after demonstration
Overall Implementation Rate (%)	Calculate after verifying implementation status

Suggested calculation: Implementation Rate = (Number of features implemented ÷ Total features proposed) × 100.

Demonstration checklist

■	Open the final Tableau workbook and confirm all worksheets load.
■	Demonstrate year, region and fuel-type filters.
■	Verify KPI cards and chart values against the dataset.
■	Explain the tax and subsidy measures without implying causation.
■	Show the dataset disclaimer: values are estimated/simulated for academic analysis.
■	Capture screenshots as evidence for the project report.

Data note: *The dashboard should be described as an academic analysis of the supplied dataset, not as a live or official fuel-price monitoring system.*
