PROJECT INITIALIZATION AND PLANNING PHASE

Project Proposal (Proposed Solution)

Date	02 November 2026	**Prepared for**	Anushka Dubey
Project Title	Global Fuel Prices and Taxation Trends (2020–2026)	**Team ID**	To be provided
Maximum Marks	3 Marks	**Technology**	Tableau

1. Project Overview

Objective	To analyse global petrol, diesel and LPG price patterns from 2020 to 2026 and explore how regional differences, taxation, subsidies and income groups relate to fuel prices.
Scope	The dashboard covers 84 countries across 7 regions using 7,056 quarterly records. It includes fuel-price trends, regional and country comparisons, estimated tax shares, and subsidy-related analysis. Users can filter by year, region and fuel type.

2. Problem Statement

Description	Fuel prices vary across countries and over time. Differences in taxation, subsidies, economic conditions and fuel type make it difficult to compare markets using scattered data or isolated charts.
Impact	Without a consolidated view, users may struggle to identify price trends, compare regional patterns, understand estimated tax burdens, and examine how subsidy levels relate to fuel prices.

3. Proposed Solution

Approach	Prepare and organise the quarterly dataset, build calculated measures where required, and develop an interactive Tableau dashboard. Use charts, KPI cards and filters to make comparisons accessible.
Key Features	Nine views: Fuel Price Trends; Quarterly Fuel Price Trends; Regional Comparison; Regional Tax Comparison; Country Ranking; Subsidy vs Fuel Price; Tax Analysis; Tax Share by Income Group; and Taxation vs Subsidies. Include KPI cards and year, region and fuel-type filters.

4. Resource Requirements

Resource Type	Description	Specification / Allocation
Hardware	Computing device	Laptop/desktop capable of running Tableau; recommended 8 GB RAM or more
Memory & Storage	Working memory and project files	8 GB RAM recommended; sufficient local storage for dataset, workbook and exports
Software	Visualisation platform	Tableau Public or Tableau Desktop
Supporting tools	Data preparation and documentation	Spreadsheet software; PDF/document viewer; web browser
Data	Global fuel price dataset	7,056 quarterly records; 84 countries; 7 regions; 2020–2026; petrol, diesel and LPG
Personnel	Project execution and presentation	Anushka Dubey – project planning, data analysis, dashboard development, testing and demonstration

Data note: The dataset contains estimated/simulated values for academic analysis. Findings should be presented as dataset-based insights, not as verified official market quotations.

PROJECT PLANNING PHASE

Product Backlog, Sprint Planning, Stories and Story Points

Date	02 November 2026	**Team ID**	To be provided
Project Name	Global Fuel Prices and Taxation Trends (2020–2026)	**Maximum Marks**	8 Marks

1. Product Backlog and Sprint Schedule

Sprint	Functional Requirement (Epic)	User Story No.	User Story / Task	Story Points	Priority	Team Member
Sprint 1	Data understanding & preparation	USN-1	As a project owner, I want to inspect the dataset fields and data types so that the analysis is based on a clear data structure.	3	High	Anushka Dubey
Sprint 1	Data quality	USN-2	As a project owner, I want to check missing values, duplicates and inconsistent records so that the dataset is ready for visualisation.	5	High	Anushka Dubey
Sprint 1	Data preparation	USN-3	As a user, I want fuel types, regions, dates and measures organised consistently so that filters and comparisons work correctly.	5	High	Anushka Dubey
Sprint 1	Project setup	USN-4	As a developer, I want to connect the prepared data to Tableau and verify the fields so that dashboard development can begin.	7	High	Anushka Dubey
Sprint 2	Trend analysis	USN-5	As a user, I want annual and quarterly fuel-price trend views so that I can identify changes over time.	6	High	Anushka Dubey
Sprint 2	Regional analysis	USN-6	As a user, I want regional and country comparisons so that I can compare price levels across markets.	7	High	Anushka Dubey
Sprint 2	Tax & subsidy analysis	USN-7	As a user, I want tax-share and subsidy-related views so that I can explore their relationship with fuel prices.	7	High	Anushka Dubey
Sprint 3	Dashboard design	USN-8	As a user, I want the nine visualisations arranged in a clear dashboard so that the analysis is easy to understand.	8	High	Anushka Dubey
Sprint 3	Interactivity	USN-9	As a user, I want year, region and fuel-type filters so that I can explore selected subsets of the data.	6	High	Anushka Dubey
Sprint 3	Summary metrics	USN-10	As a user, I want KPI cards and clear labels so that key information is visible at a glance.	6	Medium	Anushka Dubey
Sprint 4	Testing & refinement	USN-11	As a project owner, I want to test filters, chart interactions and calculations so that the dashboard behaves consistently.	8	High	Anushka Dubey
Sprint 4	Documentation	USN-12	As a reviewer, I want project documentation and a data disclaimer so that the dashboard's scope and limitations are clear.	5	Medium	Anushka Dubey
Sprint 4	Demonstration	USN-13	As a presenter, I want a planned demo flow so that the project can be explained within the allotted time.	7	Medium	Anushka Dubey

2. Project Tracker and Sprint Estimates

Sprint	Planned Story Points	Duration	Start Date	Planned End Date	Planned Completion	Release / Review
Sprint 1	20	6 days	03 Nov 2026	08 Nov 2026	20 points	08 Nov 2026
Sprint 2	20	6 days	09 Nov 2026	14 Nov 2026	20 points	14 Nov 2026
Sprint 3	20	6 days	15 Nov 2026	20 Nov 2026	20 points	20 Nov 2026
Sprint 4	20	6 days	21 Nov 2026	26 Nov 2026	20 points	26 Nov 2026

Velocity estimate: Planned average velocity = 20 story points per 6-day sprint (approximately 3.3 story points per day). This is a planning estimate; actual velocity should be updated after each sprint review.

Burndown tracking: Record remaining story points at the end of each working day. Start each sprint at 20 points and update the remaining-work figure as tasks are completed. No actual completion figures are assumed in this plan.

PROJECT DEMO PLANNING

Global Fuel Prices and Taxation Trends (2020–2026)

Date	02 November 2026
Presenter	Anushka Dubey
Project Name	Global Fuel Prices and Taxation Trends (2020–2026)
Maximum Marks	1 Mark

Demo Plan

The demonstration will introduce the problem, explain the dataset and solution, walk through the interactive Tableau dashboard, and conclude with key observations and limitations.

S.No.	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the project title, objective and challenge of comparing fuel prices across countries, regions and time.	1.0	Anushka Dubey
2	Dataset & Solution Overview	Explain the 2020–2026 quarterly dataset, 84 countries, 7 regions, fuel categories, key fields and Tableau-based approach.	1.0	Anushka Dubey
3	Live Feature Demonstration	Show KPI cards, nine dashboard views, and year, region and fuel-type filters. Highlight trend, regional, tax and subsidy analysis.	3.0	Anushka Dubey
4	Key Insights & Limitations	Summarise observations from the dashboard and clarify that the dataset contains estimated/simulated values for academic analysis.	1.0	Anushka Dubey
5	Conclusion & Future Scope	Recap the value of interactive comparison and mention possible future work such as adding verified live data and more countries.	0.5	Anushka Dubey
6	Q&A; Session	Answer questions about the dataset, visualisations, filters and interpretation.	1.5	Anushka Dubey

Demo Flow Summary

Step	Activity	Notes
1	Introduction & Problem Statement	State the objective and why a consolidated comparison is useful.
2	Solution Overview	Describe data scope, preparation and Tableau dashboard structure.
3	Live Feature Demonstration	Apply filters and move through the nine visualisations in a logical sequence.
4	Insights, Limitations & Q&A;	Share observations, explain the simulated-data disclaimer and answer questions.

Presentation checklist

■	Open and test the Tableau workbook before the presentation.
■	Confirm all filters, KPI cards, titles and chart labels are readable.
■	Keep the dataset source and simulated-data disclaimer ready to explain.
■	Prepare a backup PDF or screenshots in case the live workbook does not load.
